Call for papers - Special Issue: Renewable Energy Deployment in Developing Countries

Journal of Renewable Energy Sources - Technology, Business, and Policy invites submissions (research papers and reviews) for Special Issue titled: Renewable Energy Deployment in Developing Countries. Research papers addressing how renewable energy deployment is or can be deployed across developing and underdeveloped countries are welcome. Reviews synthesising useful knowledge from recent literature can also be submitted. Renewable energy can be harvested in many developing countries if existing barriers are overcome. Therefore, papers identifying harvesting potential, deployment barriers and how to overcome these barriers will attract readers. The focus should be on technology, business, and policy of renewable energy sources across developing countries. Moreover, the submitted manuscript must not be considered for publication elsewhere and must be fully original.

Deadline for submission: 15 January 2018

Please send your manuscript to Editor-in-Chief: wojciech1@budzianowski.eu
